COVID-19 Policies

Update June 16, 2021

In accordance with the reduction of COVID-19 in our community, the availability of vaccines, and the change in state mask mandates, the updated guidelines have been adopted by LSA. For these purposes, “vaccinated individuals” are those who are two weeks post-completion of their vaccine regimen.

Masking & Vaccination status:

- LSA will no longer require masks.
 - *LSA reserves the right to set masking / distancing requirements for certain events. (e.g. camps, synchro, etc.)*
- Unvaccinated individuals are encouraged to follow CDC and state guidelines as it pertains to masking and social distancing.
- We ask for unity and respect towards one another regarding individual mask decisions.
- LSA will not be asking individuals for proof of vaccination.

COVID-19 cases/exposures:

- Regardless of vaccination status, any positive cases of COVID-19 need to be reported to the LSA skating director so we may notify those who may have been in close contact.
- Anyone testing positive for COVID-19 should isolate for 10 days and must be symptom free for 24 hours before a return to the rink.
- Unvaccinated individuals in close contact with a positive COVID-19 individual should isolate for 10 days. If they obtain a negative COVID test, they may return to the rink after 7 days.
- Vaccinated individuals do not have to quarantine after an exposure.

Health Surveillance:

- Temperature checks are no longer required upon entry into Iceland.
- Anyone exhibiting symptoms, developing a fever, or not feeling well should continue to stay home and seek the advice of their health care provider before any return to the rink.
- For those who are traveling, please follow CDC guidelines as it relates to your situation depending on destination and vaccination status.
